PixelScroll lists free Kindle eBooks every day that each includes their genre listing, synopsis, and cover. PixelScroll also lists all kinds of other free goodies like free music, videos, and apps.

1982 Toyota Supra 5m Ge

In 1982, when the 5M-GE was introduced, Toyota was the world's largest maker of DOHC engines (their R-series four-cylinders had also been adapted to have twin cams). They put the camshafts in the 5M-GE on either side of the engine, directly over the valve system, reducing weight and allowing higher revving and quicker response.

The 5M-GE was a big step forward for Toyota: It sported a belt-driven, wide-angle aluminum DOHC head (becoming the first Toyota six to sport an aluminum DOHC head since the 2000GT) as well as digital Bosch L-Jetronic injection. The 5M-GE was rated at just 145hp at its 1982 launch, but continued to evolve over the course of the Mk II's life.
