required amount of fuel. The air flow sensor employs a hot wire anemometer to sense air intake – and is consequently known as a hot wire system. Within certain limits, engine changes including displacement changes from 3.9 to 3.5 litre do not significantly alter the 14CUX's ability to correctly fuel the engine. Even aggressive

LAND ROVER FUEL INJECTION SYSTEM

We are currently converting a 110 to 3.9 v8, this is a conversion i have done before and followed the wiring diagrams that worked a treat. However this time our 3.9 came from a 1998 discovery when we removed the engine along with the complete loom we found the main 7 pin connector to be a different colour then the normal white and it had 7 ...

With each generation the control system's electronic hardware and its programming improved, so the final version is preferable. The final version of Lucas electronic fuel injection was called "14CUX". 14CUX system were installed from 1990 through 1995 on engines with displacements of 3.9 and 4.2 liters.
