ATA 100 contains the reference to the ATA numbering system which is a common referencing standard for commercial aircraft documentation. This commonality permits greater ease of learning and understanding for pilots, aircraft maintenance technicians, and engineers alike. The standard numbering system was published by the Air Transport Association on June 1, 1956.

Chapter 05 Time Limits/Maintenance Checks - Extra Aircraft

In total, over 8,000 CFM56-7B engines are in service on 737 aircraft, making it the most popular engine-aircraft combination in commercial aviation. The engine's broad-based market acceptance has been because of its simple, rugged architecture, which gives it the highest reliability, durability and reparability in its class.

CFM56 - CFM International Jet Engines CFM International

AMM Definition. The formal document which details the way in which all maintenance tasks carried out on an aircraft shall be accomplished. This includes items such as lubrication system functional checks and servicing of the airplane but usually excludes structural repairs and modifications.
