Today, most manufacturers have pilot controls as optional equipment in order to meet the demands of the tech-minded. A traditional backhoe with manual controls boasts a much simpler design than its equivalent pilot control model. Machines with manual controls have the control levers mechanically connected to the spools in the control valve.

Machines with manual controls have the control levers mechanically connected to the spools in the control valve. When a control lever is moved, the mechanical connection directly shifts the spool, allowing oil from the pump to be directed to a cylinder to perform a given function, such as moving the boom, bucket or swing.
