OpenLibrary is a not for profit and an open source website that allows to get access to obsolete books from the internet archive and even get information on nearly any book that has been written. It is sort of a Wikipedia that will at least provide you with references related to the book you are looking for like, where you can get the book online or offline, even if it doesn't store itself. Therefore, if you know a book that's not listed you can simply add the information on the site.

Architecture And Participation

Bringing together leading international practitioners and theorists in the field, ranging from the 1960s pioneers of participation to some of the major contemporary figures in the field, Architecture and Participation opens up the social and political aspects of our built environment, and the way that the eventual users may shape it. Divided into three sections, looking at the politics, histories and practices of participation, the book gives both a broad theoretical background and more ...

The ideal architecture of participation combines the best of ownership of design with the best of collaboration by the masses. If you have no architect, you have no participation. But if you have no participation, it matters little what the architect does. When the architect (whether its a person or a team) is a

Architecture and participation (eBook, 2005) [WorldCat.org]

In my opinion, participation is one of “architecture of solidarity” methods defined there. On the other hand, there are some experiments and examples in the recent history of architecture, such as the works of Hassan Fathy, Lucien Kroll, etc. What is the story of participatory design, and why has it come up again?
