toolkit: ☐☐ Red Team ...

Penetration testing versus red teaming. We often hear them used interchangeably, but in fact they're two distinct things. So what exactly is the difference between the terms pen test vs. red team? In this article we'll explain, with the goal to help you learn more about which one might be the best fit for your organization.

Penetration Testing Vs. Red Teaming: What's the Difference?

In military jargon, the term Red Team is traditionally used to identify highly skilled and organized groups acting as fictitious rivals and/or enemies to the "regular" forces, the Blue Team. Whenever we discuss Information Security from a defensive point of view, we are inclined to think about protection, damage control, and reaction. However, adopting an [...]

Penetration Testing Versus Red Teaming: Clearing the Confusion

If a security team uses standard pentesting tools, runs their testing for only one to two weeks, and is trying to accomplish a standard set of goals—such as pivoting to the internal network, or stealing data, or getting domain admin—then that's a Penetration Test and not a Red Team engagement.
