Authagraph

AuthaGraph is an approximately equal-area world map projection invented by Japanese architect Hajime Narukawa in 1999. The map is made by equally dividing a spherical surface into 96 triangles, transferring it to a tetrahedron while maintaining area proportions, and unfolding it onto a rectangle.

AuthaGraph projection - Wikipedia

About AuthaGraph We, AuthaGraph Co., Ltd. are a design firm. We have dedicated ourselves in research and development on an idea highly based on geometrical studies mainly by means of model making. Then we carefully apply these pure geometrical ideas to practical usages according to various social needs in design, fine art and engineering.

The globe packs how the latest world map, AuthaGraph is made of. An AuthaGraph map is installed in the globe. The product three dimensionally reproduces two steps of its projection process from a sphere to a tetrahedron. By assembling the product you can learn complex geometries of these three polyhedra used for AuthaGraph's projection.

This World Map Is Weird — And Weirdly Accurate

The design, called AuthaGraph, is so good, it's took out Japan's biggest design accolade, the Good Design Award, in 2016. Created by artist and architect Hajime Narukawa, the map looks pretty weird at first glance, with an orientation shift between Asia and North America, but it's actually one of the most proportional maps we've got.
