Chapter 2: Polynomial and Rational Functions Topic 2: Quadratic Functions (Day 2) Do Now: A parabola has a minimum or maximum point at its vertex. If a parabola opens up, its vertex is a minimum. If a parabola opens down, its vertex is a maximum. For each parabola below, state if it has a min or a max, and determine the coordinate point. 1. 2. 3. 4.

Chapter 2: Polynomial and Rational Functions

Polynomial and rational functions are two of the most common types of functions used in algebra and calculus. In Chapter 2, you will learn how to graph these types of functions and how to find the zeros of these functions. Aerodynamics is crucial in creating racecars. Abstract. One of the unifying themes of modern mathematics is that in order to understand any class of mathematical objects, one should also study mappings between those objects, and especially the mappings which preserve some property of interest. For instance, in linear algebra after studying vector spaces, you also studied the properties of linear mappings between vector spaces (mappings ...
