**HORSE FACT SHEET** The horse is an odd-toed ungulate mammal belonging to the taxonomic family Equidae. The horse has evolved over the past 45 to 55 million years from a small multi-toed creature into the large, single-toed animal of today. Humans began to domesticate horses around 4000 BC, and their domestication is believed to have been ...

### **HORSE FACT SHEET - World Animal Foundation**

Far too many animals in this country are initially loved and then neglected or abandoned over time because owners decide — too late — that caring for pets is more responsibility than they actually want. The truth is, adopting a companion animal is a big step — one that will affect your lifestyle for many years.
