CONTINENTAL ENGINE PARTS

This is a Continental F163 flathead 4-cylinder gasoline engine we rebuilt for a Clark forklift. We completely disassembled the engine and put the block, crank, rods, & cylinder head in our Bayco oven to be completely thermal cleaned. After the thermal cleaning we put the parts in our Zero shotblaster before performing a magnaflux and pressure test on the engine block and cylinder head to make sure there were no cracks and or leaks.

Kaiser, working with a Continental-designed engine, introduced the USA's first mass-produced OHC inline six-cylinder engine. It debuted in Kaiser-owned Jeep Corporation vehicles in the mid-1960s. However, Stutz built both single and dual overhead cam inline six-cylinder engines in, respectively, the late 1920s and early 1930s (sohc) and the early 1930s (dohc).
