Getting to Know CSS. Cascading Style Sheet or CSS is a stylesheet language that dictates how your website elements should look like. You can control the design, layout, font, and the color of your website content by embedding a CSS file into your HTML document. Let's take a look at how CSS works, by breaking down the syntax: selector {declaration}

### The Complete CSS Cheat Sheet in PDF and JPGs

Cascading Style Sheets (CSS) is a stylesheet language used to describe the presentation of a document written in HTML or XML (including XML dialects such as SVG, MathML or XHTML ). CSS describes how elements should be rendered on screen, on paper, in speech, or on other media. CSS is among the core languages of the open web and is standardized across Web browsers according to W3C specifications.

### CSS: Cascading Style Sheets | MDN

CSS (Cascading Style Sheets) is used to style and lay out web pages — for example, to alter the font, color, size, and spacing of your content, split it into multiple columns, or add animations and other decorative features. This module provides a gentle beginning to your path towards CSS mastery with the basics of how it works, what the syntax looks like, and how you can start using it to add styling to HTML.
