Detroit Diesel Engine 6 71

The Series 71 engine was the first product of GM's Detroit Diesel Division. It was a two-cycle engine with a displacement of 71 cubic inches per cylinder. Initially intended to be used in GM's trucks and buses, the engine was also designed to take advantage of a variety of manifolds, mountings, generators and transmissions, allowing it to be used in a wide range of marine and industrial applications.

The History of the Detroit Diesel 6-71 TIB | It Still Runs

The inline six-cylinder 71 series engine was introduced as the initial flagship product of the Detroit Diesel Engine Division of General Motors in 1938. The V-type first appeared in 1957. Sales of The 71 Series ceased in the summer of 1995, with the four stroke Detroit Diesel engine introduced as a replacement.
