Timing Belt Replacement Interval Guide - Gates Corporation

In fact this engine actually has two belts. The first is the main timing belt that keeps the cam and crank shafts in synchronization with each other. The second belt is another toothed belt on the back of the engine that needs replacing at the same time. This belt is for the diesel high pressure fuel pump and must be replaced at 100,000kms as well.

Ford Territory Diesel Timing Belt - gdlauto.com.au

Your timing belt should be replaced every 50,000-70,000 miles, depending on your car's make and model. Also, make sure you understand if your engine is an interference engine or a non-interference engine. In an interference engine, the valves and piston share the same airspace and the

timing belt keeps them from touching. This is why you'll have a major engine failure on your hands if the belt breaks or skips.

How to Know When to Replace Your Timing Belt

The timing belt is attached by way of a series of pulleys to the engine's crank and cam shaft. The crankshaft powers the engine's connecting rods which are attached to pistons inside the combustion chamber. The camshaft operates the cylinder head valves and rocker arm assembly, which sends fuel into the combustion chamber and expels burnt gases out of the exhaust manifold.

Dumb question but does the engine have a timing chain or ...

Timing belts are more likely to fail than timing chains, but both should be inspected on a regular basis and for those engines employing a timing belt, regular replacement is essential. If your Honda was built after 1997, the replacement interval for your timing belt is typically around the 105.000 mile mark.

Honda Timing Belt Or Timing Chain (Complete List ... - TBK ...

There is an easy way to find out if your car is driven by a timing chain or timing belt motor. If, on the side (not top) of the engine, either left or right, there is a plastic cover, your car has timing belt. If there is no plastic on the side, you have a timing chain.

use timing belts now because they're quieter but still offer a long service interval. I would certainly imagine the service interval for the belt to be 150K miles. And just FYI, the 6.6 doesn't have a timing chain; it's gear driven (which would be my preference). But this is a very robust little engine.

Duramax 2.8L and Timing Belt | Chevy Colorado & GMC Canyon

The Mitsubishi 4D56 diesel engine is widespread and has earned popularity among fans of SUVs and pickups worldwide. However, if you don't provide maintenance when it's due or if you fail to comply with the installation instructions of the timing drive system, the engine can cause a lot of problems for car owners.

If the car has a star somewhere, it should be a Mercedes and it would have a chain instead of a belt (I'm not sure actually if a timing belt had been used on some engines but I'm not aware of any, this one would have a chain anyway). The chain too needs to be serviced although it would accept a lot more miles. By the way, this one must be a ...
