solution manual it is very hard to see how you get the answers.

This book fills in the gap. One thing to take note is that the book only shows odd question answers and only answers to medium or hard questions, self explanatory questions are ignored.

Thus the solution of the partial differential equation is  $u(x,y)=f(y+\cos x)$ . To verify the solution, we use the chain rule and get  $u_x = -\sin x f'(y+\cos x)$  and  $u_y = f'(y+\cos x)$ . Thus  $u_x + \sin x u_y = 0$ , as desired.
