CAR ECU REMAP GUIDE. Posted by Glenn Rowswell on 5th January 2012. As you already know, respected Fast Car user, an engine's ECU controls everything from immobilising the engine to optimising fuel economy. Fair play, like, but this is Fast Car magazine: we don't do MPG, we do BHP and torques! And we want decent performance increases with ...

A map is a set of instructions programmed onto the car's ECU by the manufacturer to handle the fuel air mixture and hundreds of other parameters. A remap is changing the manufacturer's engine "map" to a custom setup of your own. For example the manufacturer map may include a fuel quality adjustment for safety purposes.

The '96 Passats were actually OBD1 at first unless they got the TSB recall ECU. The OBD1 ECU is 8 bit and uses two DIL EPROMs. '97-'98 Passats and MK3's used OBD2 ECU's that used two PLCC32 EPROMs. These were 16 bit. Nothing is OBD flashable until 2000 model year.

DIY ECU tuning? | TDIClub Forums

There are now many businesses which offer a DIY option for remapping your HDi at home with the use of a low-cost ecu reader/writer. The process is often that you read the original data from the ECU and send it to the tuner via email (these files are very small), they will then make the necessary adjustments and send it back to you.

Hi, Is the cooper s (2006) ecu easily remappable? I am fitting a supercharger from a 2006 cooper s on a 1979 Lotus engine with injectors, throttle body etc from the s, the body is an Eclat and running gear 1984 Lotus Excel. There are a lot more mods but thats boring. Does anyone know what is...

DIY remapping | MINI Cooper Forum

ECU remapping is easy and safe with ECM Titanium Each ECU manages all the sensors and actuators of the engine system. These parameters can be read by KESSv2 and K-TAG, saved in one file that you can customize with ECM Titanium software. After that, you can re-write back the new modified file using KESSv2 or K-Tag in the ECU.

ECM Titanium Mapping Software | Alientech

On my 996TT I run Tial GT28 turbos, Fabspeed exhaust, ID 1000 injectors, wagner intercoolers, a bunch of other bolt-on mods and run the OEM ECU Mafless (MAF sensor removed). With this setup I can easily generate 1.3 bar of boost at less than 3,000 rpm
