...

The moment that the Ethereum community has been waiting for finally seems at hand: The move to a faster, more energy efficient proof-of-stake blockchain has begun. Ethereum 2.0 will move the No. 2 cryptocurrency's blockchain from a Bitcoin-style, energy-hungry, proof-of-work (PoW) consensus mechanism to a faster, more energy efficient proof-of-stake (PoS), in which blocks are confirmed by ...

The ethereum 2.0 testnet has pretty much reached its goal of around 524,000 eth deposited to the smart contract. It is now good to go on August the 4th 2020 at around 1 to 2 PM London time when the genesis block of the ethereum 2.0 testnet goes live this Tuesday.

### **Ethereum 2.0 Testnet Now Good To Go - Trustnodes**

Ethereum 2.0 testnet standing chain, Aug 2020. New nodes apparently just need to go through the syncing, and they need to become aware of these forks, and then they drop off those forks with the node then jumping to the valid tip. Apparently this needs to get to a participation rate of 66%, with those that have dropped off getting slashed until ...

### **Ethereum 2.0 Testnet Breaks Into 4 Forks - Trustnodes**

Like any traditional software stack, the complete "Ethereum stack" varies from project to project depending on your business goals. There are, however, consistent layers of the stack that help provide a mental model for how software applications interact with the Ethereum blockchain.

## **Medalla data challenge | ethereum.org**

Ethereum 2.0 testnet incorrect participation rate, Aug 2020. Raul Jordan, an eth 2.0 dev for Prysmatic explained further that the current participation rate is apparently not correct because: "Almost no one is synced to the chain head, so unless you have a node that is synced to head, we can't get participation reliably.

## **Ethereum 2.0 Testnet Crashes - Trustnodes**

The ethereum 2.0 testnet consensus failure appears to be fatal with the network still not up and running after three days following a bug that brought down nodes. That bug had the effect of instantly crashing all prysm nodes, which were the vast majority, but also it increased the resource requirements of other node clients with Lighthouse nodes for example needing 70GB storage and some 14GB memory at some point.

Ethereum 2.0 may not launch until 2021, according to Ethereum Foundation researcher Justin Drake. Ethereum 2.0 transitions the network from a proof-of-work system. It's been in the works for years. Vitalik Buterin, co-founder of Ethereum, has argued against Drake's claims and believes that Ethereum 2.0 is still on track to launch this year.
