126 METHODS IN PSYCHOLOGICAL RESEARCH Whether you are surveying people on the street or gathering participants for an experiment, you are selecting a sample from a population of potential participants. Probably the only research that is conducted on whole populations is carried out by government agencies when they conduct a census.

### Selecting Research Participants

Research is central to the field of psychology, without which no advances can be made, and no results or theories concluded. Because the field is so diverse and studies are based primarily on the function and effect of various factors on the human mind, several methods of research have been designed to help us narrow down a study and help draw a conclusion from it.
