### File Upload In Asp Net

ASP.NET has two controls that allow users to upload files to the web server. Once the server receives the posted file data, the application can save it, check it, or ignore it. The following controls allow the file uploading: `HtmlInputFile` - an HTML server control. `FileUpload` - and ASP.NET web control. Both controls allow file uploading, but the `FileUpload` control automatically sets the encoding of the form, whereas the `HtmlInputFile` does not do so.
