Checks, captures, and mate threats therefore are known as forcing moves. In other words, they are moves that force your opponent to pick from a small set of possible replies. They are the essence of tactical chess; they allow you to dictate your opponent's moves and thus control how the board will look two or three or more moves from now.

### The Forcing Move. - Chess Tactic

An important principle in chess is the concept of the "forcing move". A forcing move is one which requires the opponent to reply in a certain way, or which greatly limits the ways in which he can respond. Essentially, a forcing move is either a check, a capture, or a threat.
