GNS3 is absolutely brilliant for creating labs. You can usually find labs that people have created online. Just beware on what you're downloading though ;) What I tend to do is read the CCNA book and then follow the labs that are in the book. Doesn't usually take too long to setup the lab. GNS3 is a graphical front end to a product called Dynagen. Dynamips is the core program that allows IOS emulation. Dynagen runs on top of Dynamips to create a more user friendly, text-based environment. A user may create network topologies using simple Windows ini-type files with Dynagen running on top of Dynamips.
