This is an incomplete list of standards published by the International Electrotechnical Commission (IEC).. The numbers of older IEC standards were converted in 1997 by adding 60000; for example IEC 27 became IEC 60027. IEC standards often have multiple sub-part documents; only the main title for the standard is listed here.

Objective of this Standard is to explain how failure modes and effects analysis (FMEA), including the failure modes, effects and criticality analysis (FMECA) variant, is planned, performed, documented and maintained. This Standard is identical with, and has been reproduced from, IEC 60812:2018, Failure modes and effects analysis (FMEA and FMECA).

### **AS/NZS IEC 60812:2020 - Standards New Zealand**

What is this standard about? It describes how to perform a systematic failure modes and effects analysis (FMEA). An analysis of this kind establishes how an item or process might fail to perform its function and suggests how an identified failure might be treated or remedied.
