### LoadRunner and Performance Center Monitoring Best ...

HP (formerly Mercury) LoadRunner enables customers to obtain an accurate picture of end-to-end system performance, verify that new or upgraded applications meet specified performance requirements and to identify and eliminate performance bottlenecks during the development lifecycle.

### HP LoadRunner - Configipedia - BMC Documentation

LoadRunner Professional reproduces real business processes. Scripts can be easily modified to emulate real user behavior. It emulates hundreds or thousands of concurrent virtual users, (with minimal hardware), to apply accurate workloads to any application and capture end-user response times for business processes and transactions, ensuring that applications meet requirements.

## **LoadRunner: Application Load Testing Tools | Micro Focus**

LOADRUNNER is a Performance Testing tool which was pioneered by Mercury in 1999. LoadRunner was later acquired by HPE in 2006. In 2016, Loadrunner was acquired by MicroFocus. LoadRunner supports various development tools, technologies and communication protocols.

## **What is HP LoadRunner? Introduction, Architecture, Components**

Depending on the technology, type of application and topology, LoadRunner sets-up a communication between Vuser and Server. The request sent by the Vuser should be understood by the server so that it can send a proper and correct response to Vuser. Hence LoadRunner uses the protocol to make smooth and comprehend communication.
