Long-span buildings create unobstructed, column-free spaces

greater than 30 metres (100 feet) for a variety of functions. These

include activities where visibility is important for large audiences

(auditoriums and covered stadiums), where flexibility is important

(exhibition halls and certain types of manufacturing facility), and where

complex Structure ...

When utilizing a LongSpan™ structure, spans upwards of 80' can be achieved for a single structure, allowing for more than 20% additional coverage in some cases. While most jobs do not require a structure as large and complex as a long span, there are some cases where a long span is the best option.
