Mathematical gems II (Book, 1976) [WorldCat.org]

Download File PDF Mathematical Gems li

Mathematical Gems I and II, published in 1973 and 1976, were the first two in the MAA's series of Dolciani Mathematical Expositions. Mary Dolciani was a Cornell Ph.D. (1947, number theory) who taught for many years at Hunter College. She wrote secondary school textbooks that sold millions of copies.

Mathematical Gems II | Mathematical Association of America

Mathematical Constants II. Famous mathematical constants include the ratio of circular circumference to diameter, $\pi = 3.14 \dots$, and the natural logarithm base, $e = 2.718 \dots$. Students and professionals can often name a few others, but there are many more buried in the literature and awaiting discovery.

(about Mathematical Gems II) K. E. Hirst in Mathematical Reviews "These delightful little books contain between them 27 short essays on topics from geometry, combinatorics, graph theory and number theory. The essays are independent, and can be read in any order... overall these are serious books presenting pretty mathematics with elegant proofs.
