Michael Polanyi: The Art of Knowing by Mark T. Mitchell

Michael Polanyi FRS was a Hungarian-British polymath, who made important theoretical contributions to physical chemistry, economics, and philosophy. He argued that positivism supplies a false account of knowing, which if taken seriously undermines humanity's highest achievements. His wide-ranging research in physical science included chemical kinetics, x-ray diffraction, and adsorption of gases. He pioneered the theory of fibre diffraction analysis in 1921, and the dislocation theory of plastic

Personal Knowledge: Towards a Post-Critical Philosophy

These Lectures were intended to form an extension of the enquiry undertaken in my recently published volume on Personal Knowledge. But since it proved impossible to proceed from the point reached in that book without first recapitulating the relevant parts of its argument, the first two lectures had to be used largely for this purpose.
