## **Nutrition Research Methodologies | Request PDF**

Nutritional scientists discover the health effects of food and its nutrients by first making an observation. Once observations are made, they come up with a hypothesis, test their hypothesis, and then interpret the results. After this, they gather additional evidence from multiple sources and finally come up with a conclusion.

## **HLTH 625: Nutrition Epidemiology & Research Methods**

In its first strategic plan for nutrition, the NIH 2020-2030 Strategic Plan for Nutrition Research cited the need for precision nutrition, which is the study of how individuals respond differently to food and nutrients relative to health outcomes. Texas A&M AgriLife recognizes the value of investing in precision nutrition.
