PL/SQL User's Guide and Reference 10g Release 2 (10.2)

SQL and PL/SQL are fundamental to all Oracle application development. SQL is the language used to query and modify Oracle databases. PL/SQL is used to create and call triggers, stored procedures and functions, and PL/SQL packages. Other programming technologies depend upon SQL and PL/SQL to interact with the Oracle Database server.

Oracle Database Online Documentation 12c

A PL/SQL procedure is a reusable unit that encapsulates specific business logic of the application. Technically speaking, a PL/SQL procedure is a named block stored as a schema object in the Oracle Database. The following illustrates the basic syntax of creating a procedure in PL/SQL:
