The Political Economy of Globalization

It is an axiom of political economic analysis that material (i.e. economic) well-being, and changes therein, are the fundamental drivers of politics (politics over economic issues such as globalization and post-Modernization). This axiom certainly draws credibility from the rhetoric around the public politics of those issues.

The New Economics and Politics of Globalization | OpenMind

This is a graduate seminar for students who already have some familiarity with issues in political economy and/or European politics. The objective is to examine the ways in which changes in the international economy and the regimes that regulate it interact with domestic politics, policy-making, and the institutional structures of the political economy in industrialized democracies.

Globalization: A Guide to Selected Resources

Globalization is a process of growing exchange, interaction and integration between people, governments and private organizations across the globe. International trade, capital flows, migration, technological transfer and cultural exchanges are some of the typical manifestations of this process. The encounters and relationships between ancient civilizations and the colonization processes initiated during the Age of Discoveries were archaic and early-modern forms of globalization.

A: Globalization is the expanding cultural, political, and economic connections between people around the world. I believe globalization has affected the economy over the past decade by increasing the export and gross domestic product ratio worldwide, increased economic growth in countries such as Chad, China, India, and Nigeria, and increased economic equality.
