### **Potty Training Tips | Parents**

Potty training success hinges on physical, developmental and behavioral milestones, not age. Many children show signs of being ready for potty training between ages 18 and 24 months. However, others might not be ready until they're 3 years old.

### **Potty training: How to get the job done - Mayo Clinic**

Grandparents, just like parents, should avoid making too big a deal out of a child's success at using the potty. If your child then has an accident, she'll feel that she has let down the people who care about her. And grandparents, like parents, should refrain from scolding or punishing a child for toileting mistakes.

The pediatrician can help make the parents' (and thus the child's) life easier by helping parents properly assess the child's readiness before beginning the toilet training process. At the very least, the toddler should be able to indicate wants and needs verbally, and should have the motor skills to sit on, and rise from, the potty chair.
