Project-based learning (PBL) is a student-centered pedagogy that involves a dynamic classroom approach in which it is believed that students acquire a deeper knowledge through active exploration of real-world challenges and problems. Students learn about a subject by working for an extended period of time to investigate and respond to a complex question, challenge, or problem.

**Project-based learning - Wikipedia**  
Project based learning is a dynamic approach to teaching in which students explore real-world problems and challenges. With this type of active and engaged learning, students are inspired to obtain a deeper knowledge of the subjects they're studying. When designing or planning projects, the work or task is meaningful if it fulfills two criteria.

**7 Steps to Successful Project Based Learning - Eva Varga**  
Project Based Learning (PBL) is an instructional methodology encouraging students to learn by applying knowledge and skills through an engaging experience. PBL presents opportunities for deeper learning in-context and for the development of important skills tied to college and career readiness.

**What is Project Based Learning?**  
In Project Based Learning, the project is the vehicle for teaching the important knowledge and skills student need to learn. The project contains and frames curriculum and instruction. In contrast to dessert projects, PBL requires critical thinking, problem solving, collaboration, and various forms of communication.

**Project Based Learning: Explained. - YouTube**  
Project-based learning is a component of an inquiry-based approach to learning. In this approach, students create knowledge and understanding through learning activities built around intellectual inquiry and a high degree of engagement with meaningful tasks.

**Project-based Learning Activity - Sun Associates**  
How and when should I use assessment strategies in project-based learning? Assessment should be an ongoing practice when implementing PBL. Assessment does not always need to be formalised or a common task - it can be conversational or through reflection; however, all assessment should be done in the spirit of informing teacher practice and tracking students' progress and achievements.

**Project-based learning assessment - Department of Education**  
'Projects' can represent a range of tasks that can be done at home or in the classroom, by parents or groups of students, quickly or over time. While project-based learning (PBL) also features projects, in PBL the focus is more on the process of learning and learner-peer-content interaction that the end-product itself.

**The Difference Between Projects And Project-Based Learning**  
Project-based learning takes the essential characteristics of what we value most about education and puts them front and center of our formal learning environments. It is a popular and noble aspiration for educators to inspire and develop life-long learners.
