The relay is located in the engine main fuse relay control box. The defective ECM-power relay is removed from the control box by pulling it straight up and out of socket. The new ECM-power relay is installed into the socket and the engine scanned for codes. The engine is started and the ECM-power relay is tested for proper operation.

I've been enjoying the tdclub.com community for a few years now but I've found the built-in forum search tools a bit unsatisfying. After reading the ump-teenth "do a search" reply today it seems like some of you may feel the same way so I decided to make a new Google-powered search tool I'm calling the VW TDI Search Engine.
