Simply put, 'socio-spatial learning' rests on the premise that spatial planning knowledge is reworked or reframed upon community engagement. The current challenge is to establish its existence, and so a configuration of non-tokenist participation that holds promise for the production of knowledge for spatial planning is provided here.

### Socio-spatial learning: A case study of community ...

Socio-spatial complexity and Foucauldian discourse analysis are expanded in leisure. • Foucauldian analysis conceptualizes leisure development as socio-spatial complexity. • Leisure-led development shapes complex or non-linear socio-spatial processes. • Discourses enable and constrain complex spatial processes as strange attractors •

### Socio-spatial complexity in leisure development ...

Knowledge is social as it represents relationships among people, things and places, and is spatial as it represents the structures and dynamics of these relationships. Knowledge provides the means by which we shape our socio-spatial environments, just as our environments shape the way we come to think and act.

### Iris Publication

First, it argues that it is important for planners to engage with the complexity of the socio-spatial dynamics of the city. Second, it suggests that planners need a stronger understanding of urban...

### (PDF) Rethinking Spatial Planning - ResearchGate

Socio-Spatial Planning promotes a novel understanding of how to transform the built environment in collaboration with its users. Our courses pay attention to the social, cultural, political, and economic environment in which decision-making on spatial interventions takes place.

Following this line of inquiry, Soja asserts that there exists "a complex socio-spatial dialectic operating within the structure of the economic base, in contrast to the prevailing materialist formulation which regards the organization of spatial relations only as a cultural expression confined to the superstructural realm."

### Notes on Socio-Spatial Dialectics in Critical Theory ...

School segregation is therefore mainly a mirror of the socio-spatial structure of the cities. In these systems, however, school choice and private schools play a highly selective role in detaching a relatively small, highly privileged part of the student population from the public locally-based system.
