Statistics Test B Probability Part Iv Answer

However, she is a streak shooter, and if she hits the center on one shot, her probability of hitting it on the shot immediately following is 0.85. Written in probability notation: $P(A) = P(B) = P(\text{hitting the center on one shot}) = 0.70$ $P(B|A) = P(\text{hitting the center on a second shot, given that she hit it on the first}) = 0.85$.
63. Calculate the probability that she will hit the center of the target on two consecutive shots.
