While on the other hand it is considered to be Arts which refers to the skill of handling facts so as to achieve a given objective. It is co

Is statistics an art or science? - Quora

According to Tippet, "Statistic is both a science and an art. It is a science in that its methods are basically systematic and have general application and art in that their successful application depends, to a considerable degree, on the skill and special experience of the statistician, and on his knowledge of the field of application."
