### The Age Of Space Commercialization

This makes sense, as the typical investment horizon for a VC is 7 to 10 years. Space commercialization is here to stay despite the challenges and obvious roadblocks. Space -based enterprises...

### Opportunities and challenges in commercializing space ...

Both space age and information age denote a new period in human technical advancement.Space age was an extremely common term during the space race of the 1960s. For example, innovative products of the time were commonly referred to as "space age" technologies. Since the commercialization of the internet in the mid-1990s, the term information age, to denote the age of computers, has become more common.It is unclear how future historians will label the current time period.
