Adler also acknowledges that for some people birth order may not be as significant an influence as parental attitudes, gender roles or socio-economic issues. He encouraged practitioners to understand the psychological situation in each family is different; birth order is simply one possible tool to help guide and assess.

Moreover, the following psychological changes become more prominent during the third trimester (compared to the first and second trimesters): 1) Transition to parenthood. Pregnancy is the beginning of a significant psychological transformation for parenthood. This is a quite complex psychological process of establishing a new identity a parent.

## **Psychological Changes during Pregnancy: An Emotional Upheaval**

For the first time in history, the relations inside the brain were accounted for through strict laws of physics. This marked the birth of psychology as a science. But it was not that simple. The human mind does not lend itself to scientific observation as is the case for hard sciences.
