Topographies Of Faith Religion In

Series:International Studies in Religion and Society, Volume: 17. Based on ethnographic explorations in cities across the globe, Topographies of Faith offers a unique and compelling analysis of contemporary religious dynamics in metropolitan centers. While most scholarship on religion still sidelines questions of spatiality and scale, this book creatively draws on perspectives from urban studies to study the spatiality of religion in modern cities.

Therefore, from diffused religion people can move towards world diffused religions. It is quite evident that theory of diffused religion is not devoid of empirical support but, on the contrary, proves to be of greater validity and applicability, not only in Europe but also in other non-European areas, by presenting conclusive, recurring features.
