UNIX User's Manual (4.1.1.0) - NAS Security

The first thing to realize is that not all find commands are created equal. The find you will find on a Linux system is different then what you will have on a BSD-based system like OSX. The reference you are going off is for Linux. For the find command the '-type' option is an expression and must be after the path.

Unable to understand Unix 'find' commands' manuals completely

The Tenth Edition Research Unix System did boast this published manual, but the software itself was never collected in a single place as a distribution. It was used in the Computing Sciences research group at Bell Labs as a resource through the last of our Vax machines, but not ported en masse to other hardware, nor put on a tape and sent outside the company (or for that matter inside).

Unix Tenth Edition Manual

Manuals for the end user contain the information you need to install and configure a DIGITAL UNIX system, bring it up on a network, and use it. The documentation in this category is grouped in three primary areas: startup documentation, general user documentation, and system and network management documentation.

The DIGITAL UNIX Manuals

Format the manual page referenced by `alias', usually a shell manual page, into the default troff or groff format and pipe it to the printer named ps :
\$ man -t alias | lpr -Pps. output: command content will be sent to printer. Example-4: Search the short descriptions and manual page names for the keyword printf as regular expression.

man - Unix, Linux Command - Tutorialspoint

man command in Linux with Examples - GeeksforGeeks

In Unix-like and some other operating systems, find is a command-line utility that locates files based on some user-specified criteria and then applies some requested action on each matched object.. It initiates a search from a desired starting location and then recursively traversing the nodes (directories) of a hierarchical structure (typically a tree).

find (Unix) - Wikipedia

I'm sure it's really easy, but I have searched on Google and on the forums and haven't found anything. For instance, if I open the grep manual (man grep), I can't close it. I've tried ctrl+c, ctrl+x, scrolling to the bottom of the manual. How can I exit the manual without closing the shell? ... (8 Replies)

No manual entry for - The UNIX and Linux Forums

Unix First Edition Manuals. The manuals are only available in PostScript files with scans of the originally typewritten manual. Here you can find an experimental HTMLfication of the OCRd postscript scans using much shell scripting hackery. Due to the automatic nature of the conversion, ...
