What are the trading strategies for the VIX? Hedging Against the Stock Market. The most common reason for trading the VIX is to hedge against market crashes. As the volatility index is inversely related to the stock market most of the time, it offers a good hedge. To hedge against your stock holdings, buy out-of-the-money VIX call options.

One of the biggest risks to an equity portfolio is a broad market decline. The VIX Index has had a historically strong inverse relationship with the S&P 500® Index. Consequently, a long exposure to volatility may offset an adverse impact of falling stock prices.

## **Vix-Index - Cboe**

Relationship of the VIX and S&P 500. Key areas to watch on are 44-37 range on the VIX and on the RSI 51. We will not see a sustained rally on the S&P500 until the Vix RSI fails through 51 while the Vix capped under 37 level. The market will need some time to work off the volatility surge if this Asian contagion is actually over.

## **The VIX Volatility Trader by Ninjacators**

Specifically, the expected volatility implied by SPX option prices tends to trade at a premium relative to subsequent realized volatility in the S&P 500 Index. Market participants have used VIX futures to capitalize on this general difference between expected (implied) and realized (actual) volatility, and other types of volatility arbitrage strategies.
